10km of walk for relax and enjoy the pure natur

INFORMATION

This route leads over several old estates such as Santiani and Monnàber. Winding dirt roads through lush green meadows, this is how the country site of Mallorca must have looked like 2 centuries ago. Passing fallow fields and ancient olive groves we discover the surprisingly quite hinterlands of Campanet. Part of this route follows the old road from Pollensa to Selva, which ran parallel to the Sant Miquel stream. Nowadays you will hardly find anybody in the area, this extraordinary well-preserved landscaper all for yourself. A small track of paved road takes us to the centre of Campanet where a cup of coffee on the main square is a pleasant way to take a small break before returning to Monnàber Nou. An ideal walk for the whole family, or just to for a morning or afternoon to explore the surroundings of the Monnàber property.
